DATA CABLING / VOICE CABLING

NetPro Group is certified to install most branded cable makes. The cables that are installed by certified installers qualify to be included in a long term warranty program should the user prefer.

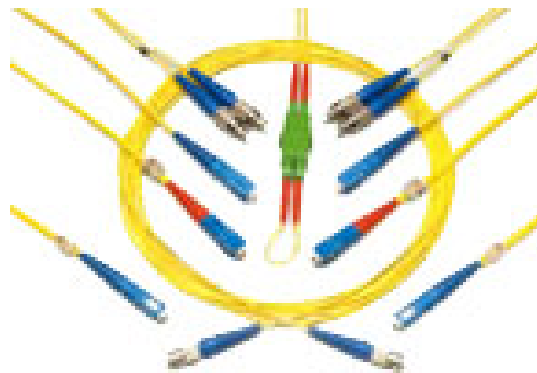

Data cabling is roughly divided into three categories.

Low Speed Copper

High Speed Copper

Fibre Optic: Single mode and multi mode.

The low speed copper (Cat3) is used mainly for telecoms connections and instrumentation signal media.

The high speed copper is used mainly for computer data transfer.

NetPro's focus is on **quality** and **service**

DATA CABLING / VOICE CABLING

The fibre optic cable is used mainly for long distances and as a bridge across adverse electrical interference areas.

We also do structured cabling, convergent cabling and POE (Power over Ethernet).

NetPro's focus is on **quality** and **service**
